

EXPERIENCE

- Incorta**
BI Solution Engineer II

Riyadh, KSA
Mar 2024 – Present

 - Led end-to-end Incorta platform implementations for enterprise clients in the fintech sector, including a 2-year engagement with Neoleap, a leading Saudi fintech company.
 - Architected and delivered real-time data pipelines using Apache Spark Structured Streaming and Apache Kafka, enabling high-volume ingestion of financial transaction data.
 - Scoped and estimated implementation effort for new client projects, translating complex business requirements into actionable delivery plans.
 - Authored technical design documents capturing solution architecture, data models, and implementation decisions across multiple client engagements.
 - Conducted enablement sessions for customers and colleagues on Incorta platform capabilities, best practices, and advanced use cases.
 - Collaborated cross-functionally across customer teams, implementation partners, and Incorta stakeholders to ensure on-time, on-scope delivery.
- Orange Business Services**
Business Intelligence Engineer

Cairo, Egypt
Jul 2022 – Feb 2024

 - Designed, developed, and maintained ETL pipelines using Talend and SSIS, improving data processing reliability and reducing pipeline failures.
 - Built data integration workflows using C# and Entity Framework, connecting disparate source systems to centralized BI infrastructure.
 - Developed reports in SAP BusinessObjects Web Intelligence and redesigned Power BI dashboards for improved performance, usability, and visual clarity.
 - Conducted source system analysis to assess data quality and readiness for Power BI reporting, driving data governance improvements.
 - Automated cleaning and archival of historical data files using Python, significantly reducing manual effort.
 - Certified Scrum Master; facilitated agile ceremonies and promoted iterative delivery practices within the team.
- Ejada Systems**
Business Intelligence Analyst

Riyadh, Saudi Arabia
Nov 2020 – Jun 2022

 - Delivered end-to-end BI solutions using the Microsoft stack (SSIS, SSAS, Power BI), from source system analysis through data modeling to final dashboard delivery.
 - Partnered with clients to translate business requirements into optimized Power BI data models and interactive visualizations.
 - Implemented Denodo data virtualization to unify access across siloed source systems, reducing data duplication and integration complexity.
 - Developed custom Power BI visuals using JavaScript and D3.js to meet client-specific reporting needs.
 - Led multiple POC projects evaluating new BI technologies and methodologies for clients across Saudi Arabia.
 - Automated API-to-CSV data extraction using Python, streamlining data ingestion for reporting workflows.

EDUCATION

- Cairo University, Faculty of Engineering**
B.Sc. in Computer Engineering — Grade: Very Good

Cairo, Egypt
Sep 2015 – Aug 2020

PROJECTS

- **SDA Dashboard — Freelance:** Full BI solution for Sharqia Development Authority (Saudi Arabia): Power BI Report Server with scale-out deployment, custom KPI data model, and executive dashboard designed in Figma.
- **Handsa Mobile App — Freelance:** Cross-platform mobile application using React Native for a construction company in Kuwait.
- **Distributed File System:** Console-based distributed file system in Python with replication and fault-tolerance capabilities.

TECHNICAL SKILLS

- **Languages & Query:** Python, SQL (Spark SQL, Oracle SQL), JavaScript, DAX, C#, HTML, CSS
- **Data Engineering:** Apache Spark, Spark Structured Streaming, Apache Kafka, Talend, SSIS, Entity Framework
- **BI & Analytics:** Incorta, Power BI, SSAS, SAP BusinessObjects, Denodo, D3.js
- **Human Languages:** Arabic (Native) English (Professional)
